PROFESSIONAL SUMMARY

Android Engineer with hands-on experience building native Android apps in Kotlin and cross-platform apps in Flutter. Experienced in consuming REST APIs, real-time communication (WebSocket, SignalR), Firebase Cloud Messaging push notifications, clean architecture, automated testing, and CI/CD. Also comfortable with backend development in Go and TypeScript.

TECHNICAL SKILLS

Languages: Kotlin, Java, Dart, Go, TypeScript

Android: Android SDK, MVVM, MVI, Clean Architecture, Dependency Injection, Google Maps SDK

Messaging and Networking: Firebase Cloud Messaging (FCM), Push Notifications, REST APIs, WebSocket, SignalR

Cross-Platform: Flutter, React Native

Tools and DevOps: Git, GitHub, Firebase, Docker, Fastlane, CI/CD Pipelines

Testing: Unit Testing, Integration Testing, Mockito, Flutter Test, Jest

PROFESSIONAL EXPERIENCE

Mobile Developer Mar 2025 – Present

Avalon Labs

- Develop De9De9, a multi-service home services app built with Flutter, focused on scalability and user experience.
- Integrated Firebase Cloud Messaging (FCM) push notifications for booking updates, offers, and reminders.
- Consumed and integrated RESTful APIs for authentication, bookings, and payments.
- Implemented secure authentication and payment flows: Apple Pay, Google Pay, and CIB/Dahabia in-app browser integrations.
- Built and optimized real-time chat between clients and professionals using SignalR.
- Set up CI/CD pipelines to automate builds and deployments, increasing release frequency and reducing manual errors.
- Wrote unit and widget tests to maintain production quality.

Android Developer Jul 2024 – Mar 2025

Sphinx Telecom International

- Built a chunk-based file upload system for large reports and attachments, improving reliability on unstable networks.
- Integrated WebSocket communication for real-time synchronization of tasks and reporting flows.
- Implemented secure authentication and role-based access control to protect sensitive data.
- Applied dependency injection and clean architecture to keep the codebase maintainable and testable.
- Integrated map SDK features for geolocation and task visualization used by field engineers.
- Established unit and integration tests to reduce regressions before production releases.

PROJECTS

Find Eat App 2024

Freelance

- Flutter app connecting businesses and users around local deals, with a location-based "Near Me" feature, QR code scanning for discounts, favorites, and real-time deal updates.

EDUCATION

Master's Degree, Systems Engineering 2023 – 2025

Université Yahia Farès de Médéa

- Coursework in distributed systems, cloud computing, networking, security, and machine learning.
- Thesis: reinforcement learning for predicting DoS and DDoS attacks.

Bachelor of Science, Information Systems (Computer Science) 2020 – 2023

Université Yahia Farès de Médéa

- Foundations in programming, algorithms, networking, and databases.
- Launched a startup project: a mobile app connecting parents with nannies.
